CONTENTS

OF THE

12th YEAR OF THE ENGLISH EDITION.

No. 1. — January 1930.	PAGES.	NUMBERS of the decimal classification.
I. **Calculation of continuous girders carried on columns rigidly held at their bases,** by Léon Lègens	1	624 .2
II. Report No. 1 (Belgium, France, Italy, Portugal, Spain, and their Colonies) on the question of **recent improvements in permanent way tools and in the scientific organisation of maintenance work** (subject IV for discussion at the eleventh Session of the International Railway Congress Association), by D. Mendizabal	9	625 .172 & 625 .173
III. Report No. 5 (Germany) on the question of **improvements in the steam locomotive** (subject VI for discussion at the eleventh Session of the International Railway Congress Association), by R. P. Wagner	99	621 .134
IV. Report No. 3 (Belgium, France, Italy, Portugal, Spain and their Colonies) on the question of **economical traction methods for use in particular cases** (subjet XII for discussion at the eleventh Session of the International Railway Congress Association), by O. A. Gaeremynck	147	621 .132.8 & 656 .22
V. Report No. 5 (Germany) on the question of **competition of road transport** (subject XIII for discussion at the eleventh Session of the International Railway Congress Association), by Dr. Zietzschmann	191	656 .1 & 656 .2
VI. Report No. 3 (all countries except America, the British Empire, China, Japan, Belgium, France and their Colonies) on the question of the **co-operation of the staff towards increased efficiency and its participation in the profits** (subject XV for discussion at the eleventh Session of the International Railway Congress Association), by R. Marin del Campo and J. Canovas del Castillo	215	385 .524
VII. Report No. 5 (Germany) on the question of **locomotives of new types; in particular turbine locomotives and internal combustion motor locomotives** (subject V for discussion at the eleventh Session of the International Railway Congress Association), by Professor Nordmann	259	621 .132.8
VIII. Report No. 4 (Germany) on the question of the **methods to be used in marshalling yards to control the speed of vehicles being shunted** and to ensure they travel on to the lines in the various groups of sidings (subject X for discussion at the eleventh Session of the International Railway Congress Association), by Dr.-Ing. Gottschalk	309	625 .258 & 656 .212.5
IX. Current practice:		
High pressure locomotive with water tube boiler, London & North Eastern Railway	369	621 .132.3 (.42) & 621 .132 8 (.42)
London & North Eastern Railway 20-ton **goods brake van with ferro-concrete body**	374	625 .246 (.42)
The London Midland & Scottish Railway Company's **locomotive having a boiler pressure of 900 lb. per square inch**	376	621 .132.3 (.42)
X. Bibliography of railways:		
I. Books	1	...
II. Periodicals	3	...

949186

	PAGES.	NUMBERS of the decimal classification.
No. 2. — February 1930.		
I. **A solution of the transhipment question,** by P. Bâcle	379	625 .617 (.44)
II. Report No. 2 (America, the British Empire, Holland and Colonies, China and Japan) on the question of **recent improvements in permanent way tools, and in the scientific organisation of maintenance work** (subject IV for discussion at the eleventh session of the International Railway Congress Association), by Ch. H. J. Driessen.	385	625 .172 & 625 .173
III. Report No. 3 (Europe, except France) on the question of **rail motor cars** (subject XX for discussion at the eleventh session of the International Railway Congress Association), by Z. Závadjil	443	621 .132.8
IV. Report No. 1 (Europe) on the question of the **electrification of secondary lines** (subject XIX for discussion at the eleventh session of the International Railway Congress Association), by L. Sękutowicz.	491	621 .33
V. Report No. 3 (Belgium, France and their Colonies) on the question of the **relations between railways and sea ports** (subject IX for discussion at the eleventh session of the International Railway Congress Association), by Ulysse Lamalle	535	656 .213
IV. Report No. 4 (Germany) on the question of **economical traction methods for use in particular cases** (subject XII for discussion at the eleventh session of the International Railway Congress Association), by Mr. Leibbrand .	585	621 .132.8 & 656 .22
VII. Report No. 4 (Germany) on the question of **all-steel coaches. Comparison with vehicles built of wood** (subject VIII for discussion at the eleventh session of the International Railway Congress Association), by Mr. Dähnick . .	635	625 .23
VIII. Report No. 2 (all countries except Europe) on the question of the **electrification of secondary lines** (subject XIX for discussion at the eleventh session of the International Railway Congress Association), by D. Eugenio Ribera and José Maria Garcia-Lomas	665	621 .33
IX. Report No. 3 (Belgium, France and their Colonies) on the question of **signalling of lines for fast traffic and in main stations. Daylight signals. Automatic block system** (subject XI for discussion at the eleventh session of the International Railway Congress Association), by G. C. A. Willaert	723	656 .25
X. Recent types of **sand blast machines for railway workshops,** by W. Rudolph.	749	621 .138.5 & 625 .26
No. 3. — March 1930.		
I. Report No. 5 (America) on the question of **economical traction methods for use in particular cases,** (subject XII for discussion at the eleventh Session of the International Railway Congress Association) by H. B. Voorhees and G. H. Emerson	771	621 .132.8 & 656 .22
II. Report No. 4 (America) on the question of **locomotives of new types; in particular turbine locomotives and internal combustion motor locomotives** (subject V for discussion at the eleventh Session of the International Railway Congress Association), by A. Lipetz	863	621 .132.8
III. Report No. 3 (Germany) on the question of the **use in railway work of machines for simplifying statistical and accountancy work** (subject XIV for discussion at the eleventh Session of the International Railway Congress Association), by Messrs. Tecklenburg and Gaier	951	651 & 652

No. 3. — March 1930 (Continued).	PAGES.	NUMBERS of the decimal classification.
IV. Report No. 5 (Germany) on the question of **signalling of lines for fast traffic and in main stations. Daylight signals. Automatic block system** (subject XI for discussion at the eleventh Session of the International Railway Congress Association), by W. Stäckel	997	656 .25
V. Report No. 3 (all countries except America, the British Empire, Germany, Holland and Colonies, China, Japan, Belgium, France, Italy, Portugal, Spain and their Colonies) on the question of **recent improvements in permanent way tools and in the scientific organisation of maintenance work** (subject IV for discussion at the eleventh Session of the International Railway Congress Association), by J. Hauer.	1029	625 .172 & 625 .173
VI. Report No. 4 (Germany) on the question of **recent improvements in permanent way tools and in the scientific organisation of maintenance work** (subject IV for discussion at the eleventh Session of the International Railway Congress Association), by Dr.-Ing. Müller	1079	625 .172 & 625 .173
VII. Monthly bibliography of railways :		
I. Books	13	...
II. Periodicals	15	...
No. 4. — April 1930.		
I. Report No. 4 (Italy, Portugal, Spain and their Colonies) on the question of **signalling of lines for fast traffic and in main stations. Daylight signals. Automatic block system** (subject XI for discussion at the eleventh Session of the International Railway Congress Association), by Antonio Gibert and Julio Nogués	1161	656 .25
II. Report No. 4 (Germany) on the question of the **methods to be followed in training of staff, professionnal, technical and ordinary working grades** (subject XVI for discussion at the eleventh Session of the International Railway Congress Association), by Dr.-Ing. Bruno Schwarze.	1197	385. (07 & 385 .586
III. Report No. 3 (all countries excluding America, the British Empire, China, Japan, Belgium, France, Italy, Portugal, Spain and their Colonies) on the question of **locomotives of new types; in particular turbine locomotives and internal combustion motor locomotives** (subject V for discussion at the eleventh Session of the International Railway Congress Association), by Paul Koller	1259	621 .132.8
IV. Report No. 5 (Germany) on the question of **electric locomotives for main line traction** (subject VII for discussion at the eleventh Session of the International Railway Congress Association), by Dr.-Ing. Wilhelm Wechmann.	1309	621 .335
V. Current practice :		
Coaling of locomotive engines, London & North Eastern Railway Company.	1347	621 .138.2

No. 5. — May 1930.	PAGES.	NUMBERS of the decimal classification.
Special accounts summing up the reports on the questions for discussion at the eleventh session of the International Railway Congress Association (Madrid, 1930).		
Section I. — Way and works :		
QUESTION I. — (**The use of concrete and reinforced concrete on railways**), by F. B. FREEMAN	1353	624 .63, 625 .142 4 & 721 .9
QUESTION II. — (**Resistance of rails against breakage and to wear**), by Mr. CAMBOURNAC	1362	625 .143
QUESTION III. — (**Investigation into the static and dynamic stresses in railway bridges**), by R. DESPRETS	1379	624 .2
QUESTION IV. — (**Recent improvements in permanent way tools and in the scientific organisation of maintenance work**), by CH. H. J. DRIESSEN	1556	625 .172 & 625. 173
Section II. — Locomotives and rolling stock :		
QUESTION V. — (**Locomotives of new types : in particular turbine locomotives and internal combustion motor locomotives**), by P. KOLLER	1383	621 .132.8
QUESTION VI. — (**Improvements in the steam locomotive**), by R. P. WAGNER	1391	621 .134
QUESTION VII. — (**Electric locomotives for main line traction**), by G. BIANCHI	1410	621 .335
QUESTION VIII. — (**All steel coaches. Comparison with vehicles built of wood**), by Mr. LANCRENON	1422	625 .23
Section III. — Working :		
QUESTION IX. — (**Relations between railways and sea ports**), by C. M. JENKIN JONES	1427	656 .213
QUESTION X. — (**Methods to be used in marshalling yards to control the speed of vehicles being shunted and to ensure they travel on to the lines in the various groups of sidings**), by C. R. BYROM	1437	625 .258 & 656 .212.5
QUESTION XI. — (**Signalling of lines for fast traffic and in main stations. Daylight signals. Automatic block system**), by W. STÄCKEL	1448	656 .25
QUESTION XII. — (**Economical traction methods for use in particular cases**), by O. A. GAEREMYNCK	1460	621 .132.8 & 656 .22
Section IV. — General :		
QUESTION XIII. — (**Competition of road transport**), by A. WASIUTYŃSKI	1466	656 .1 & 656 .2
QUESTION XIV. — (**The use in railway work of machines for simplifying statistical and accountancy work**) by Dr.-Ing. TECKLENBURG	1493	651 & 652
QUESTION XV. — (**Cooperation of the staff towards increased efficiency and its participation in the profits**), by R. MARIN DEL CAMPO	1504	385 .524
QUESTION XVI. — (**Methods followed in training of staff, professional, technical and ordinary working grades**), by Mr. BARTH	1526	385. (07 & 385. 586
Section V. — Light railways and colonial railways :		
QUESTION XVII. — (**Penetration railways**), by P. JOURDAIN	1536	385. (01
QUESTION XVIII. — (**Improvements in the permanent way equipment of light railways**), by Mostafa Bey Hamdy EL KATTAN	1540	625 .614
QUESTION XIX. — (**Electrification of secondary lines**), by L. SEKUTOWICZ	1544	621 .33
QUESTION XX. — (**Rail motor vehicles**), by P. BEGHIN	1552	621 .132.8

	PAGES.	NUMBERS of the decimal classification.
No. 6. — June 1930.		
I. **Rails. Specifications and use.** Results of tests and future developments, by J. SERVAIS	1563	625 .143.2
II. **Individual axle drives for electric locomotives,** by A. M. HUG	1608	621 .337
III. Supplement No. 2 to Report No. 1 (Belgium, France, Italy, Portugal, Spain and their Colonies and Switzerland) on the question of **the use of concrete and reinforced concrete on railways** (subject I for discussion at the eleventh Session of the International Railway Congress Association), by Messrs. JULLIEN and CLAISE	1648	624 .63, 625 .142.4 & 721 .9
IV. CURRENT PRACTICE :		
Caprotti **valve gear** applied to London and North Eastern Railway engines.	1649	621 .134.3 (.42)
No. 7. — July 1930.		
I. Reorganisation of the light and heavy **repairs of goods vehicles** on the Belgian Railways, by **Mr.** WARTE	1653	625 .26 (.493)
II. **British locomotives** in 1929. Designs and work, by J. F. GAIRNS	1671	621 .132.1 (.42)
III. Supplement to report No. 4 (America) on the question of **locomotives of new types.** In particular **turbine locomotives** and **internal combustion motor locomotives** (subject V for discussion at the 11th Session of the International Railway Congress Association), by A. LIPETZ	1683	621 .132.8
IV. A new type of **ferro-concrete sleeper.** The Prot sleeper, by Marcel PROT	1701	625 .142.4
V. **Final summaries adopted at the eleventh Session of the International Railway Congress Association** (Madrid, May 1930)	1731	385. (06.111
VI. NEW BOOKS AND PUBLICATIONS :		
Report on progress in Manchuria. The South Manchuria Railway	1755	385. (09 (.51)
Reorganisation of Crewe Locomotive Works, London Midland and Scottish Railway	1755	621 .138.5
Principles of the absolute **block system,** by L. H. KIRKNESS	1756	656 .256 (.54)
VII. OBITUARY :		
Godefroi **Kunz**	1757	385. (09.2
VIII. MONTHLY BIBLIOGRAPHY OF RAILWAYS :		
I. Books	25	...
II. Periodicals	27	...
No. 8. — August 1930.		
Eleventh Session, Madrid, 5-15 May 1930. Summary of proceedings	1759	385. (06.111
List of the papers published	1760	...
Programme of events	1764	...

No. 8. — August 1930 (Continued).	PAGES.	NUMBERS of the decimal classification.
General list of delegates :		
I. Delegates of the Permanent Commission	1768	...
II. Members appointed by adherent Governments and Organisations and by affiliated Railway Administrations	1773	...
Alphabetical index of delegates	1793	...
Opening ceremony of the Session	1814	...
General officers of the Session	1822	...
Officers of sections	1824	...
Programme of sectional meetings	1828	...
Summary report of discussions in sections :		
Section I	1830	...
— II	1842	...
— III	1857	...
— IV	1872	...
— V	1891	...
General meetings	1900	...
Closing ceremony	1905	...
Permanent Commission and Secretary's Office	1908	...
Appendices :		
Visits to works, excursions, receptions, etc.	1911	...

No. 9. — September 1930.		
I. The Renory **viaduct** on the Fexhe-le-Haut-Clocher to Kinkempois line of the Belgian Railways, by J. Dubus and R. Loontjens	1919	624 .63 (.493)
II. Note on the application of **premiums for improved output** in the marshalling yards of the French Est Railway	1977	385 .524 (.44) & 656 .212.9 (.44)
III. New books and publications :		
1. **Elektrische Bahnen (Electric Railways)**, by O. Höring	2002	621 .33
2. **Précis de la construction des charpentes soudées (Summary of the construction of welded framed structures)**	2002	621 .392 & 624 .92
3. **Library catalogue of the Swiss Federal Railways**	2004	016 .385 (.494)
IV. Monthly Bibliography of Railways :		
1. Books	39	...
2. Periodicals	42	...

	PAGES.	NUMBERS of the decimal classification.
No. 10. — October 1930.		
I. **Railway curves. — Diagrams of versines and superelevations**, by J. CHAPPELLET	2005	625 .113
II. **Statistics of rail breakages** during the year 1928.	2043	313 : 625 .143.3
III. **Hardening of steel** in the Wild-Barfield electro-magnetic furnace	2094	669 .1
IV. NEW BOOKS AND PUBLICATIONS :		
1. Die **Beleuchtung von Eisenbahn-Personenwagen (The lighting of railway carriages)**, by Max BÜTTNER	2099	625 .233
2. THE RAILWAY GAZETTE. — First and Second **Special Indian and Eastern Numbers**	2099	385 .(09.1) (.5)
V. ERRATA	2101	...
VI. MONTHLY BIBLIOGRAPHY OF RAILWAYS :		
1. Books	63	...
2. Periodicals	66	...
No. 11. — November 1930.		
I. The **dispatching system** in Italy, by A. F. PIZZORNO.	2103	656 .254 (.45)
II. **Alloy steels** for railroad service.	2116	669 .1
III. **Containers for international goods traffic**	2123	625 .245 & 656 .225
IV. Interstate Commerce Commission (U. S. A.) reports on **signaling**	2129	385 .3 (73) & 656 .25 (0 (.73)
V. **Statistics of rail breakages** during the year 1928 (*concluded from October number*).	2135	313 : 625 .143.3
VI. CURRENT PRACTICE :		
The problem of **working main lines at very high speeds. Trial runs of a propeller-driven carriage** on the line from Burgwedel to Celle (Germany)	2182	621 .132.8 (.43)
VII. NEW BOOKS AND PUBLICATIONS :		
Articulated locomotives, by Lionel WIENER	2187	621 .132.8
VIII. MONTHLY BIBLIOGRAPHY OF RAILWAYS :		
1. Books	87	...
2. Periodicals	91	...
No. 12. — December 1930.		
I. Eleventh Session, Madrid : 5-15 May 1930		
General Proceedings in Sections and in General Meetings.		
1st Section : Ways and Works :		
Inaugural Meeting of the 1st Section	2191	...
QUESTION I. — The use of **concrete and reinforced concrete** on railways	2193	624 .63, 625 .142.4 & 721 .9

No. 12. — December 1930 (Continued).	PAGES.	NUMBERS of the decimal classification.
Question II. — The **resistance of rails againt breakage and to wear.** . . .	2212	625 .143
Question III. — Investigation into the **static and dynamic stresses in railway bridges**	2243	624 .2
Question IV. — Recent improvements in **permanent way tools** and in the scientific organisatiou of **maintenance work**	2256	625 .172 & 625 .173
Appendix :		
Permanent way weeding by chemical methods on the Paris, Lyons & Mediterranean Railway, by Mr. Quinquet	2279	625 .172 (44)
II. Obituary :		
Max **Weiss**	2285	385 .(09.2
III. Anabytical table of articles according to the decimal classification . . .	1 to 8	...
IV. Contents of the XIIth year of the English edition.	I to VIII	..
